Number of Vowels

```
#include <iostream>

using namespace std;

int main() {

   int n, count = 0;

   cout << "Enter string size: ";

   cin >> n;

   char str[n + 1];

   cout << "Enter a string: ";

   cin >> str;

   for (int i = 0; str[i] != '\0'; i++) {

      if (str[i] == 'a' || str[i] == 'e' ||str[i] == 'i' || str[i] == 'o' ||str[i] == 'u' || str[i] == 'A'
||str[i] == 'E' || str[i] == 'I' ||

         str[i] == 'O' || str[i] == 'U') {

         count++;

      }

   }

   cout << "Number of vowels: " << count;

   return 0;

}
```
