Sorting String

```
#include <iostream>
using namespace std;

int main() {
   int n;

   cout << "Enter string size: ";
   cin >> n;

   char str[n + 1];

   cout << "Enter a string: ";
   cin >> str;

   for (int i = 0; str[i] != '\0'; i++) {
      for (int j = 0; str[j + 1] != '\0'; j++) {
         if (str[j] > str[j + 1]) {
            char temp = str[j];
            str[j] = str[j + 1];
            str[j + 1] = temp;
         }
      }
   }

   cout << "Sorted string: " << str;

   return 0;
}
```
