Day Determiner

```
#include <iostream>
using namespace std;

int main() {
   int day;

   cout << "----- DAY OF THE WEEK -----" << endl;
   cout << "Enter a number between 1 and 7: ";
   cin >> day;

   switch (day) {
      case 1:
         cout << "Day 1 is Monday." << endl;
         break;

      case 2:
         cout << "Day 2 is Tuesday." << endl;
         break;

      case 3:
         cout << "Day 3 is Wednesday." << endl;
         break;

      case 4:
```

```
            cout << "Day 4 is Thursday." << endl;
            break;

        case 5:
            cout << "Day 5 is Friday." << endl;
            break;

        case 6:
            cout << "Day 6 is Saturday." << endl;
            break;

        case 7:
            cout << "Day 7 is Sunday." << endl;
            break;

        default:
            cout << "Invalid input!" << endl;
            cout << "Please enter a number from 1 to 7." << endl;
    }

    return 0;
}
```
